Summary — UI/UX Designer with 3+ years of experience designing user-centric digital products across multiple fields and domains. Skilled in simplifying complex workflows into intuitive, scalable interfaces. Experienced in end-to-end design processes including user research, wireframing, prototyping, and usability optimization. Strong technical background in frontend and backend systems enabling effective collaboration with developers and delivery of practical, high-impact design solution.

Skills

Tools: Figma, Photoshop, Illustrator, Canva, FigJam, Framer, Notion

Languages: JavaScript, HTML, CSS

Design Skills: User Research, Wireframing, Prototyping, Interaction Design, Information Architecture, Usability Testing, UX Writing, Design Systems, Accessibility, Localization

Professional Experience

Pathway Technologies and Services

Jul 2022 – Current

UX/UI Designer

- Designed user-centric interfaces for web applications, focusing on improving usability, clarity, and user flow efficiency.
- Transformed complex system requirements into intuitive UI solutions through wireframes, prototypes, and high-fidelity designs.
- Collaborated closely with developers to ensure accurate implementation of design systems and interaction patterns.
- Improved user experience by identifying friction points and optimizing workflows across multiple products.
- Contributed to frontend UX decisions in Vue.js-based applications, ensuring consistency between design and implementation.
- Participated in product discussions, aligning user needs with business goals and technical constraints.

Pathway Technologies and Services

May 2022– Sept 2022

UX/UI Designer Intern

- Assisted in designing wireframes and user flows for scalable web applications.
- Supported usability improvements through testing and iterative design changes.
- Worked with developers to refine UI components and improve consistency.

Education

Nepal College of Information Technology

Bachelor in Computer Engineering

Balkumari, Lalitpur

2016-2021

Prasadi Academy

+2 Science

Manbhavan, Lalitpur

2014-2016

Projects

Trip Turbo

- Led end-to-end UX design for a multi-service travel platform (flights, buses, hotels, activities).
- Designed booking flows, including traveler details, error handling, and payment experience.
- Created a unified “My Trips” system with clear booking statuses (Issued, Pending, Failed) to reduce user confusion.
- Improved form usability with features like autofill, saved travelers, and validation messaging.
- Focused on reducing drop-offs by optimizing checkout experience and minimizing friction.
- Focused Collaborated with developers to ensure scalable and consistent UI implementation.

Geokrishi

- Designed interfaces for farmers and agricultural stakeholders, focusing on simplicity and accessibility.
- Simplified complex workflows like land management, crop tracking, and service access.
- Developed localized UX (Nepali + English) for better usability among rural users.
- Contributed to e-commerce and service modules for agricultural inputs and services.
- Focused on low-tech users by improving clarity, navigation, and readability.

Seed Quality Control Center

- Designed user interfaces for a government-based seed certification and registration system.
- Simplified complex regulatory workflows (application, approval, tracking) into clear and structured user flows.
- Improved usability for multiple user types including farmers, inspectors, and administrative staff.
- Focused on reducing errors in form submission through better validation, hierarchy, and guidance.
- Designed data-heavy dashboards to present certification status, reports, and operational insights.

Green Intelligence

- Designed map-based user interactions for visualizing farmland and environmental data.
- Worked on user flows for global users with multi-language support.
- Simplified complex data visualization into understandable UI components.

Dairy Farm Decision Support Tool

- Designed dashboards for monitoring cattle lifecycle and production data.
- Created notification flows for important events and actions.
- Focused on clarity and usability for non-technical users.
